REQUEST FOR INFORMATION ON USE OF ICPSR RESOURCES

To provide funding agencies with essential information about

use of archival resources and to facilitate the exchange of

information about ICPSR participants' research activities,

users of ICPSR data are requested to send to ICPSR

bibliographic citations for each completed manuscript or

thesis abstract. Please indicate in a cover letter which data

were used.

DATA DISCLAIMER

The original collector of the data, ICPSR, and the relevant

funding agency bear no responsibility for uses of this

collection or for interpretations or inferences based upon

such uses.

CODEBOOK

NOTES TO USERS OF THE 1971 EUROPEAN COMMUNITIES STUDY

A single codebook was created to match the data for all five countries surveyed. The codebook was translated from the French and Belgian questionnaires. Users who read the other languages may wish to request the original language questionnaires in order to ascertain whether the question wording is exactly comparable.

The data were received in OSIRIS format. The variable names appear in the heading for each variable. In cases where the names differ, the non-conforming names are noted next to the codes for that country. Please note that the files are not all of the same length. In particular, several variables appear for France that do not appear for the other countries. These variables occur at the end of the French data file.

A card image version of the data was generated and deck and column numbers are noted in the codebook.

The original documentation matched a pre-OSIRIS version of the data. In the process of filebuilding codes for some variables were collapsed. The original codes were not always updated. If the recoding of a variable was documented for one country, the assumption was made that the same process occurred for the other countries. This cannot be confirmed until we communicate with the original investigator. There are also some variables for which we received no documentation. Communication with the original investigator is necessary before this can be recovered.
