## NetSense Insurance / Repair Procedure – Effective 11/11/2013

With the renewal of the NetSense study, each phone enrolled in the study now has the Total Equipment Protection (TEP) plan provided by Asurion. The plan covers lost, stolen, and damaged phones (including cracked screens) and may be invoked up to twice for each line as part of the study. As the phones fall into the highest tier of Sprint devices, the deductible for invocation of insurance is \$150. While we realize this is quite high, unfortunately such high deductibles are the norm for the insurance plans offered by all of the domestic cellular carriers (Asurion also services Verizon, AT&T, T-Mobile).

*Due to the NSF grant now having run its course and Sprint providing only service / insurance, we can no longer subsidize screen repairs nor phone replacements.*

Issues with regards to manufacturing defects (ex. constant call dropping, device restarting, broken buttons) are handled separately from insurance claims and may be addressed at the Sprint store. The store will require advance notification / authorization from the NetSense study which can be requested via [netsense@nd.edu](mailto:netsense@nd.edu). Please request authorization and we will notify you once the account has been marked to authorize you to request repairs individually.

If your phone is damaged or lost and you need to file an insurance claim, your procedure is as follows:

1. Please notify [netsense@nd.edu](mailto:netsense@nd.edu) immediately with the following information:

Name, Cell Phone Number, Phone Model (ex. Galaxy S4)

Your Local ND address (where you want the phone shipped)

The date of the breakage and a brief summary of how the breakage occurred

2. We place the insurance request through the Asurion phone insurance claim service ([phoneclaim.com](http://phoneclaim.com)) with the appropriate PIN / account authorization.
3. A new phone is shipped to you, typically one of the order of two to three days. In the meantime, your damaged device will still continue to function.
4. You will provide the \$150 deductible as a check (or cash) made out to the University of Notre Dame with the memo field of “NetSense insurance deductible, Ph XXX-XXX-XXXX.” The deductible may be dropped off to Christine Broadbent in the Department

of Electrical Engineering in 275 Fitzpatrick Hall. You will be given an e-mail receipt denoting payment of your deductible\*.

5. Your phone will arrive to your campus address (as provided above). Send the information on the outside of the phone box to [netsense@nd.edu](mailto:netsense@nd.edu). Ideally, a picture of the outside box with the IMEI / MEI number would be best. Please provide a list of times that would work to roll over the service. Do not turn on your new phone until instructed.
6. We will do our best to port the number in the timeframe requested. Once you receive a notification from us, you may turn on your new phone.
7. Send your damaged phone to Asurion per the instructions contained in the replacement phone shipment. Failure to do so may leave you liable for the entire cost of the phone. All instructions are included with the shipment.
8. Subsequent instructions will be conveyed via text or e-mail to set up and install the NetSense agent on your phone.

\* In the event of financial need, payments may be spread out over a period of time.

If you have any questions, please do not hesitate to contact us at [netsense@nd.edu](mailto:netsense@nd.edu) or to contact any of the professors in the study (Profs. Striegel, Hachen, Lizardo, Poellabauer).
