Dear NetSense Participant,

We want to bring you up to date on the NetSense Project. As some of you know, the funding for the project through the National Science Foundation is now over, but we are continuing the study thanks to the generosity of Sprint. Over 100 of the original study participants have decided to continue, and we have recruited an additional 32 students. Everyone except those who are currently studying abroad should have a new smartphone. There was a delay in getting new phones for the new recruits, but most of you now have phones. Thanks to everyone for your patience in getting things up and running this semester. There are a few things we need to bring to your attention.

- **Surveys:** As part of the requirement for being in the NetSense study we need you to complete two surveys every 3-4 months. One survey deals with basic demographic information and questions on your tastes, behaviors and attitudes. The other (network) survey, asks about the people with whom you interact.

For those continuing in the study including those who are currently studying abroad, emails with links to these surveys were sent earlier in the semester. We will be sending out another reminder soon. *Please complete these surveys as soon as possible.* The information you provide is critical to our research project.

For those who have just joined the study, you will receive two emails in the next few days with links to each of the surveys. Please complete the surveys as soon as you can.

- **Insurance:** Now that we have processed several insurance claims, we have a much better handle on what the insurance policy covers and the respective costs. Attached is a document which outlines the insurance / repair procedure for your phone that are effective for any requests made on or after November 12th. The key details are as follows:
- Repairs covered under manufacturer defects are the only ones that can be addressed at the store.
- Any lost, stolen, or damaged phones are subject to a \$150 deductible.
- We realize this is quite high but unfortunately it is the standard deductible for all major US carriers as they all use the same insurance provider with similar deductibles for smartphones.

- Screen repairs are subject to the same deductible. As the NSF grant is complete, we can no longer subsidize screen repairs as we had done in the past.
- Payment plan arrangements may be made for those with financial need.

We strongly encourage you to purchase a case for your phone if you have not done so already.

- **Study Abroad Students:** For those of you who are currently studying abroad and indicated that they wanted to continue to be in the NetSense study, we will send out an email in the next few weeks detailing how you can upgrade to your new phone.
- **Questions and Problems:** If you have any questions or problems that need to be addressed you should email netsense@nd.edu. Margaret Pickard is back from studying abroad and is very knowledgeable about the study and the phones. So please do not hesitate to email her if you have a problem that needs to be addressed.
